

The new academic year has started and we are officially launching our new HN Global online platform created by Pearson for BTEC Higher National students.

This will be a busy week for you, and we would like to help your students get the most out of their Higher National experience right from the beginning. During the induction process the only thing you will need to do is tell your students to visit highernationals.com and create a free account. Once they have done that, they will get instant access to the following resources:

Study skills modules

Online learning to help students adjust to the demands of Higher Education, including help with writing, research, and organisational skills.

Career empowerment

Access to comprehensive online career services. Students can learn how to write an effective CV and succeed at interviews, as well as access articles and online learning aimed at preparing them for the modern workplace.

Forum

A place for students and tutors to engage in conversation, ask questions about their subject and chat with peers from around the world. This is the place to go when facing any difficulties with their studies or when needing further suggestions about how to succeed.

Core textbooks (Business students only)

These digital textbooks have been mapped to the learning outcomes of the core Business units, and are compiled from industry leading publications in the field. Printed copies of these books are also available.

What about tutors?

You and your tutors can access HN Global the same way as students. You will need to visit highernationals.com and create a student account. Once you have completed the registration form, you will gain instant access to the platform.

If you are looking for further content to support your teaching, you can find it [here](#).

In case you have questions, please don't hesitate to contact us at support@highernationals.com.

Yours sincerely,

Matias Sokorai
